

mosaic **FLOOR**
applications

artREDEFINED

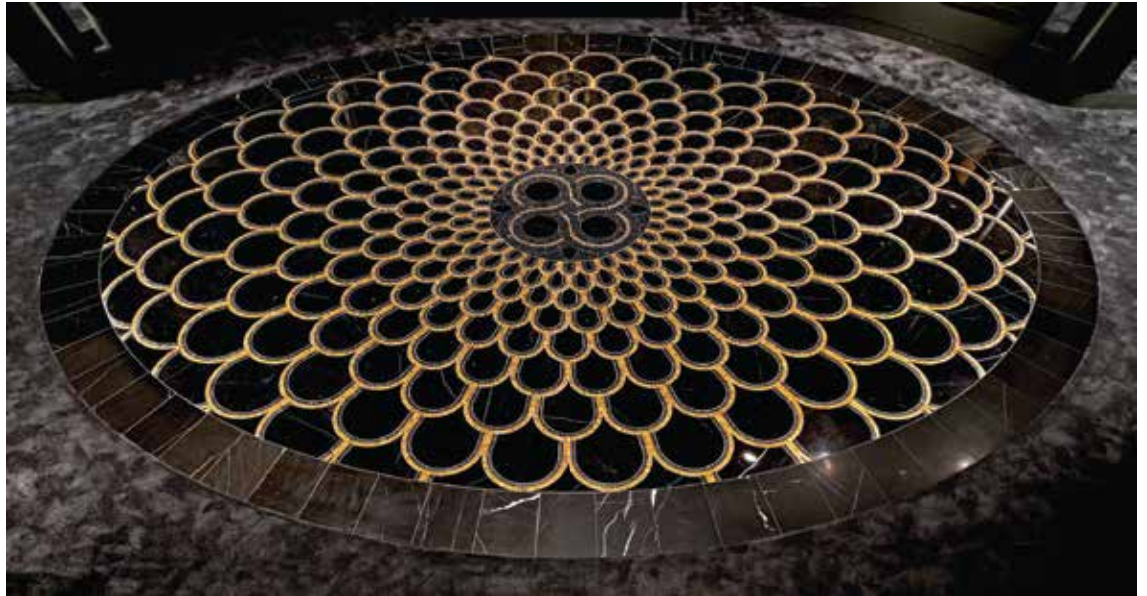

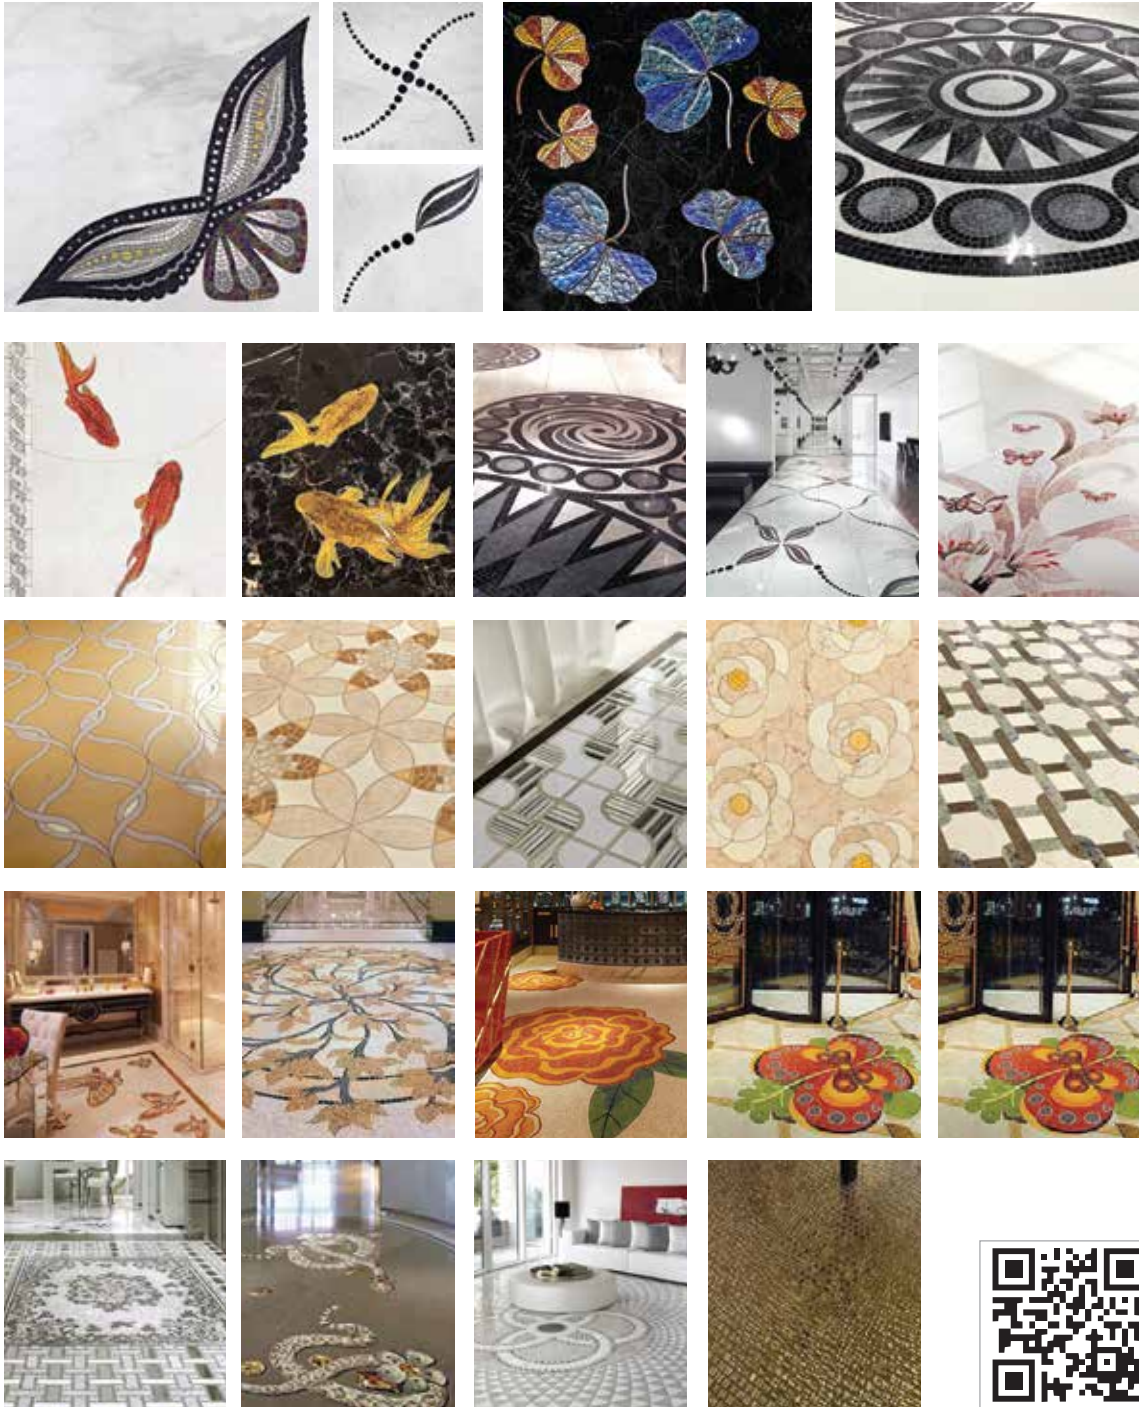

Contemporary floor mosaics usually take the form of accents such as mosaic medallions and mosaic borders instead of the larger pictorial designs that covered the entire floors of ancient Roman houses. The contemporary mosaic accents are integrated with the existing flooring material, which is usually larger tiles of marble or ceramic. These limited area designs are more practical for the simple reason that most of the floor is covered with furniture, and it only makes sense to mosaic the small part of the floor where it will be consistently visible. That being said, I would absolutely love to have a customer email me pictures of a full floor design.
